SunWize®

SunWize Power Centers with Xantrex Inverters

These packaged power centers save time, money and space by combining DC disconnects, AC bypass breakers, overcurrent protection devices, grounding components and inverters on an easy to install panel. Simply connect the power panel to the battery, PV and/or AC loads. SunWize assembled power centers are easily modified and expanded as your system grows or changes. Dimensions are 36" x 50"; with charge controller option, 36" x 55". ETL listed.
